

Cytology Clarifier

#FX2103 | GAL (3.8L), 4/CS

For In Vitro Diagnostics Use

Date Received: _____ Date Opened: _____

Cytology Clarifier™ is formulated to differentiate hematoxylin in regressive cytology H&E staining procedures. Nuclei demonstrate precisely stained nuclear chromatin, nucleoli are discrete and nuclear membranes are distinct. Non-nuclear structures show excellent staining with cytology counterstains, with ideal variations of staining of erythrocytes and nucleated cell cytoplasm.

Mucin is not stained with hematoxylin following differentiation with Cytology Clarifier™. This is the optimum differentiator for use with CDI's Harris Hematoxylin.

WARNING **HAZARD STATEMENTS**

Causes skin irritation. Causes eye irritation.

PRECAUTIONARY STATEMENTS - PREVENTION

Wash body thoroughly after handling. Wear protective gloves.

PRECAUTIONARY STATEMENTS - RESPONSE

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue Rinsing. If eye irritation persists: get medical attention.

IF ON SKIN: Wash with plenty of water. Specific treatment, see first aid section on SDS. If skin irritation or rash occurs: get medical attention. Take off all contaminated clothing and wash it before reuse.

STORAGE & DISPOSAL

Store in a well-ventilated, cool place. Keep lid tightly closed. Dispose of contents/container to an approved waste disposal plant.

NOTICE: Read Safety Data Sheet for additional information.
