PK0017 Eosin Y Powder 1 kg 8/12/1001 Rev D 2008.05.02

Made in USA

Date Received: _____ Date Opened: _____

Eosin Y is a xanthene dye and is used for the differential staining of connective tissue and cytoplasm. In histopathology, it is applied as a counterstain after hematoxylin and before methylene blue. It is also used as a background stain, thereby giving contrast to the nuclear stains

NON HAZARDOUS CHEMICAL

This chemical is not considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)

Although this product does not normally require specific hazard precautions, chemical users should always take care to minimize personnel exposure and workplace contamination.

STORAGE & DISPOSAL

Store tightly closed at room temperature. Dispose of contents/container to an approved waste disposal plant.

NOTICE: Read Safety Data Sheet for additional information.

EMERGENCY CONTACT: Chemtrec 1-800-424-9300
